*(with La Marzocco Connected scale)

Built for simplicity and precision, the Jay Grinder features a magnetic burr holder that makes it easy to clean, and rear-mounted burrs to increase the cutting surface for a fast and consistent grind. Combined with an intuitive interface for easy programming, a patented burr alignment system, and smart connectivity for grind-by-weight functionality, Jay quickly delivers exceptional consistency and quality in every shot.

JAY HIGHLIGHT

magnetic burr holder

The Jay's burr holder is magnetically attached, making it easy to remove for cleaning.

This also helps protect against damage from foreign objects, like stones, by unseating the burrs instead of cracking the burr housing. In addition, the burrs are rear-mounted to the magnetic burr holder, creating an uninterrupted cutting surface for a precision grind.

FEATURES

easy cleaning

Thanks to the design of the hopper and the easily removable magnetic burr holder, the Jay disassembles in mere seconds, giving you easy access to clean the grinding chamber.

fast grinding

The Jay is meticulously engineered to deliver fast, efficient, and consistent grinding: a typical 18-gram dose takes just under five seconds.

low retention

The grinding chamber has been specifically designed to sit at a 45 ° angle, minimizing retention to less than 2 grams of coffee.

auto-close hopper

The hopper automatically closes when removed, preventing accidental spills when changing coffee or cleaning.

SPECIFICATIONS

dimensions (W x D x H)

8" x 14" x 18.4"

weight

12kg/ 26.5lbs
